CALL FOR PAPERS

According to Previts, G. J., Parker, L. G. & Coffam E. N. (1990), history supports research in the formulation of policies and practices and in the elaboration of norms. Familiarization with professional ideas, and lessons that shape our heritage. It tells us how we can achieve a particular attention. It tells us how we reached a particular convention. The history of accounting also encourages the scholar to consider the interdisciplinary view of accounting and its environmental context. It is at this juncture that the Center for the Study of the History of Accounting at APOTEC – Associação Portuguesa de Técnicos de Contabilidade proposes to hold, together with ISCAC Coimbra Business School, on November 26, 2022, its VIII ACCOUNTING HISTORY JOURNEY, under the general theme “The relevance of history in the understanding of current accounting”, for which invite authors to present a paper.
